

CERTIFICATE Functional Safety

The STL for R5 has undergone a functional safety assessment according to the ISO 26262:2018 series of standards, resulting in a recommendation for acceptance. Therefore the

STL for R5

of ARM, UK,
is judged to support the achievement of functional safety as a SEooC.

Baseline of the product:

STL R5 version r0p0; for the HW CPU R5 version r1p3.

Maximum Automotive Safety Integrity Level: ASIL D

Assessment process:

The functional safety assessment was carried out according to the KUGLER MAAG CIE GmbH inspection process accredited by the Deutsche Akkreditierungsstelle GmbH (DAkkS, German Accreditation Body).
